## 7. SUPPORT RACES

サポートレース

### PORSCHE CARRERA CUP JAPAN (PCCJ) Round 11 (24 SEP 2023)

ポルシェカレラカップジャパン (PCCJ) 第11戦 (2023年9月24日決勝)

#### **With the power of 510ps and over! PORSCHE CARRERA CUP JAPAN is indeed the fastest "one-make" series in Japan.**

500馬力オーバー！ 日本国内最速のワンメイクレース、ポルシェカレラカップジャパン

PCCJ (Porsche Carrera Cup Japan), true to its name is a race of all Porsche machines and known to be the fastest of all one-make car race series in Japan. Since the very first event held in 2001, this year marks the 23th season for this popular series. This time's battle will be among the Porsche 911GT3 CUP (Type 992) machines, which are as always finished to racing spec already on delivery. And of course, this is exactly why the series is also known as the "Cup Cars".

PCCJ(ポルシェカレラカップジャパン)は、文字通りポルシェによって争われる、日本国内最速のワンメイクレースである。2001年のスタート以来、今年で23年目を迎える。使用されるマシンはポルシェ911GT3 CUP(Type 992)で、デリバリーされた状態ですでにレース仕様となっていることから、「カップカー」とも呼ばれている。

Again, one special feature of this race is that no modification is permitted. Just minimal adjustments such as on the suspension section, the tyre pressures are barely allowed, but otherwise all the engine and transmission sections are strictly untouchable. By providing such "equal conditions" among all cars and entrants, greater excitement gets aroused because then, it is really up to the drivers' skills and techniques that make a difference and even more importantly, influence the outcome of the race.

特徴のひとつとして挙げられるのは、改造が一切許されないことだ。サスペンションなどの微調整、タイヤの空気圧調整などが許されているだけで、エンジンやミッションにいたっては封印されているほど。イコールコンディションを保ち、ドライバーの実力で勝負できるよう配慮したためだ。

This is not the only attraction of this race, however. The 4 liters, horizontally-opposed 6 cylinder DOHC engine generates the power of 510ps, which gets transmitted by the 6 gear paddle shift. And what's more, Michelin racing slick tires at its wheels don't go unnoticed too, of course.

だからといって、物足りなさを感じることはまったくない。4リッター水平対向6気筒DOHCエンジンは510馬力を絞り出し、これを余すことなく伝えるミッションは6速パドルシフト。タイヤもミシュランのレーシングスリックを使用する。

## 8. THE HISTORY OF SUZUKA CIRCUIT

鈴鹿サーキットの歴史

**It is the passion of Souichiro Honda that brought on a “full-fledged” international racing course for the very first time in Japan. Suzuka Circuit was opened in September of 1962.**

本田宗一郎の情熱が創りあげた日本初の国際レーシングコース。1962年9月鈴鹿サーキット完成

Founded by Souichiro Honda who established Honda Motor Co, Ltd., “Suzuka Circuit” is the very first, full-scaled international racing track ever to be built in Japan, realizing all the passion and aspirations the Founder always felt for motor-sporting and mobility. According to the initial plans, a simple recreation facility was to be built over the lot. However, on the thinking that it is the Maker’s responsibility to deliver products not only as everyday-life tools or machinery, but to also offer a place so-designed and equipped to allow for both cars and bikes be ridden and “enjoyed” or tried to their maximum power for pure leisure and entertainment, and most importantly, in good safety. Therefore, the plan to build a racing circuit emerged to becoming a real, more serious development project for the company.

「鈴鹿サーキット」は、本田技研工業創業者、本田宗一郎の熱き思いが創りあげた、日本初の国際レーシングコースである。1960(昭和35年)年に稼働を開始した、本田技研鈴鹿製作所用地の一部を利用してレクリエーション施設の建設が予定されていたが、バイクや自動車を単に日常の道具として使うだけでなく、安全に思う存分楽しめる場所を提供するのがメーカーの責務との考えから、サーキット建設計画が始まったのだ。

At the time, the Japanese automotive industry was already showing rapid growth and progress, but motor-sporting was still limited to the few enthusiasts with racing activities having to take place on riverbanks and airfields, anywhere with wide space. Thus, efforts to build a real circuit were started without adequate knowledge or any expertise building a racing track, but in August of 1960 the first plan was drafted as studying the circuits of the overseas. Then, with supervision given by a Dutch designer, John Hugenholtz who designed the Zandvoort Circuit in Netherlands, Suzuka Circuit’s course layout and all the planning became more concrete in January of 1962. The endeavor eventually up-scaled and grew into a larger project as additional decisions were drawn to build alongside a totalized mobility park with “motorized” amusement rides, also a racing school to bring up racers, and enhance further advancement of this sport as well as various other facilities whatever dedicating to the future development of motorization and the automotive environment on the whole.

当時日本の自動車産業は飛躍的に発展しつつあったが、モータースポーツは一部の愛好家たちによって河川敷、飛行場などを利用して小規模に行われていた程度で、サーキット建設の専門知識もないままのスタートとなったが、外国の資料をもとに1960年8月に原案が完成。その後ヨーロッパ主要サーキットの視察、オランダのツァンドフォルトサーキットなどのデザインを手がけた専門家、ジョン・フーゲンホルツ氏のアドバイスをを受けてコースレイアウトが磨かれ、1962年1月に最終案が決まった。同時に、未来の自動車環境の発展に寄与するための教育、自動車遊園地、付帯する諸施設の建設も進める壮大な計画だった。

Finally, in September of 1962, by which time one year and three months had already passed since launch of this project in June of 1961, the new course unveiled itself. With the total length of 6,004 meters, the track width ranging between 9 to 15 meters, and a main stand large enough to accommodate 10,000 spectators, thus everyone saw birth of Suzuka Circuit, a racing course with a good diversity of 18 bends of both high and low speeds, 2 straights, even a cross-over section in one part of the track! In November of the same year, the first all-Japan road race was held as the inaugural event celebrating the birth of a brand new circuit, and then in May of 1963, the very first world-class grand prix race of this country was held - now remembered as the first Japanese Grand Prix.

1961年6月に着工し、1年3ヶ月後の1962年9月、その威容を現した。全長6004m、1万人を収容するメインスタンド、コース幅9m~15m、低速から高速まで18か所のカーブをもち、2本のストレートと立体交差を持つ鈴鹿サーキットが完成したのだ。同年11月、オープニングレースとして第1回全日本選手権ロードレースが開催され、翌1963年5月、日本初の本格的モーターレース、第1回日本グランプリ自動車レースが開催された。
